

# DOUBLE ACTION SINGLE ACTION

## KEY EDUCATION POINTS

We're showcasing why DA/SA pistols—specifically those tuned by Langdon Tactical—offer a smarter, safer, more shootable solution for people who take carrying and training seriously. This isn't nostalgia. It's modern performance with built-in safety.

## ELEVATOR PITCH ON TECHNICAL FUNCTION

DA/SA pistols start with a longer, heavier double-action trigger pull that cocks and releases the hammer. After that first shot, the slide resets the hammer for a light single-action trigger on every follow-up shot. More control when you need it. Faster shooting when you don't.

## WHY DA/SA MATTERS

### 1. FIRST SHOT CONTROL

The double-action trigger gives you feedback, resistance, and time—especially when drawing under pressure. It's deliberate on purpose.

### 2. HUMAN-FACTOR FORGIVENESS

DA/SA pistols offer a real safety margin when people are cold, tired, hungry, stressed, or task-loaded. It doesn't prevent mistakes—but it gives you one more added layer of safety.

### 3. HOLSTERING SAFETY

With hammer-fired DA/SA guns, you can physically block hammer movement with your thumb during reholstering. That alone has saved lives.

### 4. NO COMPROMISE ON PERFORMANCE

Once you're through that first DA pull, it's 1911-level single action—short, crisp, and easy to shoot well. And our DA pulls? Smooth and sub-7 lbs. You'll actually want to train with it.

### 5. IT'S DUTY-PROVEN

DA/SA isn't new—and that's a good thing. This system has decades of use in high-stakes environments. We've taken this proven system and modernized it. The safety, control, and shootability are still unmatched.

## LTT RECOMENDATIONS

### DOUBLE ACTION

#### BERETTA 92 ELITE LTT

Our flagship. Customized out of the box, smoothest DA/SA system you'll shoot.

#### PX4 COMPACT CARRY II

Soft-shooting carry gun with serious accuracy and lighter recoil than any other compact pistol.

#### HK P30 W/LEM

Hybrid feel. Striker-like consistency with double-action mechanics.

### STRIKER FIRED

#### SPRINGFIELD HELLCAT PRO

A micro-compact that doesn't compromise. Tuned trigger, optic-ready slide, and carry-friendly size.

#### HK VP9

Factory striker reliability meets HK engineering. Excellent ergonomics, clean break, one of the safest fully tensioned striker mechanisms on the market.
